DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "12" has been used to designate both a flat surface in figure 1 and the blade in figure 2. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Also, in figure 2 the blade 14 is shown with a "V-shaped" notch in the center that is not shown in the other figures for this embodiment.

2. Applicant is required to submit a proposed drawing correction in reply to this Office action. However, formal correction of the noted defect may be deferred until after the examiner has considered the proposed drawing correction. Failure to timely submit the proposed drawing correction will result in the abandonment of the application.

Claim Objections

3. Claims 5-22 and 24-26 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiply dependent claim. See MPEP § 608.01(n). Accordingly, the claims 5-22 and 24-26 have not been further treated on the merits.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3723

5. Claims 2 and (3, 4)/2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear as to what claim 2 is meant to be as it merely claims the structure of the fastening member which is not part of the tool as originally disclosed.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-4 and 23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either Eisenhower or Poling.

8. Jannke is cited as showing the use of a hollow body to allow for the bolt portion to pass there through.

Pugh, Roberts and Metcalf are cited as showing the use of a guide pin.

Jones, Fry, Bizzell, Mannion et. al. and Kozak et. al. are cited as showing the use of removably attached blades.
